PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Python, SQL, Data Analytics, AI, and Machine Learning through internships and real-world projects. Skilled in developing data pipelines, dashboards, predictive models, and AI-powered automation solutions to deliver data-driven, product-focused outcomes.

EDUCATION

Mody University of Science and Technology, B.Tech in Computer Science Engineering Aug 2023 – Present
Lakshmangarh, Rajasthan — CGPA: 8.93 / 10.00

S D Model Sr. Sec. School, Intermediate Education Apr 2022 – Mar 2023
Mandi Gobindgarh, Punjab — Percentage: 84.4%

EXPERIENCE

Data Visualization Virtual Intern Jun 2026 – Present
Infosys Springboard (Virtual)

- Designing and implementing an interactive military analytics dashboard for 140+ countries using Python, Streamlit, Tableau,
- Developing automated ETL and web scraping pipelines using Requests, BeautifulSoup, and Pandas to generate analytics-ready datasets and KPI reports.

AI/ML Intern Jun 2026 – Jul 2026
Jalte Diye Foundation

- Created AI-powered workflows, automation solutions, and data processing pipelines for the Cogentic project.
- Contributed to scalable AI applications through Git-based collaboration and process automation.

Data Science & Machine Learning Intern May 2025 – Jun 2025
YBI Foundation

- Built and validated predictive machine learning models achieving 95%+ accuracy using agricultural datasets.
- Processed and analyzed 1500+ records through data preprocessing, feature engineering, exploratory data analysis, and model evaluation to generate actionable insights.

PROJECTS

Cogentic (GitHub [↗](#)) Jun 2026

- Developed an AI-powered content generation and workflow automation platform using LLMs.
- Implemented deployment automation, testing, and Git-based collaborative development to streamline content publishing.

Soul Sense Exam (GitHub [↗](#)) Jan 2026 – Apr 2026

- Developed an EQ assessment platform using Python and MySQL with automated score calculation.
- Designed secure authentication and personalized analytics dashboards for assessment results.

AI in Agriculture – Yield Prediction (GitHub [↗](#)) Jun 2025

- Built a machine learning model achieving 95%+ accuracy for crop yield prediction.
- Performed data preprocessing, feature engineering, visualization, and model evaluation to improve prediction performance.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++

Data Analytics & Engineering: Data Cleaning, EDA, Data Visualization, Dashboard Development, ETL Pipelines, Web Scraping, KPI Reporting

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Generative AI, Predictive Modeling

Libraries & Tools: Pandas, NumPy, Scikit-learn, Plotly, Matplotlib, Streamlit, Tableau, BeautifulSoup, Requests

Databases & Cloud: MySQL, AWS

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Anaconda

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

CERTIFICATIONS

- Microsoft Applied Skills: AI Research Agents [↗](#)
- Deloitte Forage: Data Analytics [↗](#)
